

STAY CARB COMPLIANT

CARB's Clean Truck Check Act requires heavy-duty vehicles that operate or travel in the state of California to pass electronic emissions inspections. Noregon's Truck Check Up software is approved by CARB to perform and submit these inspections.

Starting
January 1st, 2025

Vehicles must pass an emissions
inspection twice per year.

Truck Check Up makes it easy for fleets to keep their vehicles compliant while enabling repair facilities to offer their customers a required service.

Easy as **1-2-3!**

Truck Check Up is simple to use and makes compliance easy with 3 simple steps:

Connect your shop device to any make/model of heavy-duty vehicle using a Noregon DLA+ 3.0 Adapter.

Open Truck Check Up and enter the CARB certified tester's credentials and vehicle details.

Click the Connect button to perform the scan and submit details to CARB for a pass/fail determination. Results can be viewed in the TCU Portal.

PURCHASE OPTIONS

PLEASE NOTE: Noregon's DLA+ 3.0 is the only approved adapter for Truck Check Up.

132400
